committed to the success of your business

Datasheet for Ahsay Online Backup

Ahsay Online Backup Suite^{TM} is a comprehensive data protection system. Ahsay^{TM} offers an easy-to-use and reliable backup solution to safeguard the important business and personal data and ensure it is readily available when needed.

Low cost, best protection
Ahsay Online Backup offers complete protection to your business data at the best value of money currently available in the market.

Reliable and proven technology
Ahsay Online Backup Suite is a proven solution with 400,000 deployments worldwide. Supported by over a thousand partners spanning across all continents of the world, Ahsay offers the trust that you need in safeguarding your critical data and leaves you with peace of mind.

Easy to use, simple to maintain
The client user interface is cleanly laid out such that backup and restore can be done typically within a few clicks. On the server side, the web-based management console provides complete user administration, comprehensive online reports and email alerts for system administrators. The **AutoUpgrade** feature allows upgrade of the client software to be completed seamlessly.

All these translate into a low Total Cost of Ownership (TCO).

Quick to market with recurring income
Ahsay Online Backup allows you to deploy your online backup service instantly with user-friendly configurations.

Added-value boosts customer loyalty
Differentiate yourself by adding data protection service to your offerings. The value-added service alleviates you from competing solely on price since customers are less likely to switch when they rely on you for protection of their critical data.

Branding-enabled
With the OEM version, you can replace Ahsay with your own brand and sell your own version of online backup software or solutions to your customers.

Flexible pricing options
Ahsay offers flexible pricing options to suit your business needs. You can buy off or lease the right to use the software. Alternatively, you can choose to pay only for the client access licenses that you have used for the month.

Secure data storage, multiple levels of protection
Data are encrypted and compressed before being uploaded and stored on the backup server. To further ensure your data safety, backed up data can be replicated and synchronized close to real-time to an Ahsay Replication Server^{TM} located in another building, region or even another country. Your customers can ensure their business continuity when struck with fires, natural disasters, terrorist attacks, wars, etc. by having data copies offsite.

Numerous customers' languages at your choice
Ahsay allows you to serve your customers in their own languages. Currently, Ahsay supports **21** languages, namely English, Czech, Danish, Dutch, Finnish, French, German, Greek, Hungarian, Icelandic, Italian, Japanese, Lithuanian, Norwegian, Portuguese, Slovenian, Spanish, Swedish, Simplified Chinese, Traditional Chinese, and Turkish.

Specialized backup agents for popular applications
Ahsay has specialized backup agents for a range of applications, namely, **Microsoft**® **Exchange Mail-Level** agent, **Microsoft Exchange Server** agent, **Microsoft SQL Server**^{TM} agent, **Oracle**® database agent, **MySQL**® database agent and **Lotus Notes**® **/ Domino**^{TM} agent.

Unlimited Scalability

Ahsay Online Backup is designed with scalability in mind. Ahsay supports network storage devices such as NAS and SAN, allowing you to expand your storage capacity or the number of client access licenses seamlessly without disruption of your backup service.

Trial accounts for your customers

You have the option to allow potential customers to register for trial accounts on your backup server, and allow them to test out your service before signing up.

More reliable and faster backups

Ahsay comes with a flexible backup scheduler. Your customers can easily implement the desired backup policies. Moreover, Ahsay can back up **opened files**, e.g. **Microsoft Outlook**® mailboxes can be backed up while your customers' are working on their emails. Furthermore, backup of larger files can be completed in a much shorter timeframe with Ahsay's **In-File Delta** feature, which minimizes data transfer by uploading only the modified data blocks.

Simple & smart restore from anywhere at anytime

Ahsay's web interface allows your customers to restore their backup files from anywhere at anytime. Moreover, Ahsay provides flexible retention policy settings which allow your customers to restore snapshots of their data sets as of a particular point in time to recover a past version of a file due to whatever reasons.

Professional technical support

Ahsay provides extensive and quality support on product-related queries and issues. Queries are handled within 24 hours and typically well within a few hours.
